20/20 Vision

This small, lightweight camera from Twenty 20 is the perfect way to relive any epic ride. The camera itself is small, lightweight and easy to use. The entire package comes complete with a camera, battery, helmet mount, record cable and microphone. To use the camera just plug the record cable into a recording device, hook the battery up, mount the camera and away you go.

Stuff

Protection

This burly skid plate is designed to protect against the demanding conditions of off-road riding by providing full coverage in the most compact design available on the market. Engineered to provide the narrowest glide path possible, the .160-inch-thick aluminum, TIG-welded construction and solid seven-point mount system will help to ensure it handles anything. Access to the oil filter and fluid drain bolts without having to remove the skid plate makes service maintenance easy. All the necessary mounting hardware is included, as well as a replacement motor mount bolt and CNC-machined billet brackets.

APPLIED RACING CRF50 BMX BAR/CLAMP/CONTROLS COMBO KIT

Apply Yourself

The machining and detail on this fully CNC-machined top triple clamp makes this one trick accessory. The unique one-piece handlebar mount is also completely machined from 6061-aluminum. Its reversible angled design allows either a forward or reverse bar position that is approximately 2.5 inches higher than stock. It is anodized with a red or black finish, with custom engraving, to give the kit that final touch. The entire package includes a BMX handlebar with: a bar pad; motocross grips; brake perch and lever with a cable; and its true 1/4-turn motocross throttle with a cable.

PARK TOOL FFS-2 SUBFRAME AND HANDLEBAR STRAIGHTENER

\$... \$70.00
6 LONG LAKE RD.
ST. PAUL, MN 55115
888/568-4959

Leverage

This versatile FFS-2 allows professional and home mechanics to repair damaged tubing that otherwise may have to be scrapped. The open-hook design enables handlebars and subframes to be straightened, as well as ATV racks. It has an extended handle, which provides for excellent leverage. Vinyl coating on the hook and on the fulcrum pad protects painted surfaces. The hook has over 8 inches of adjustment. The FFS-2 is built from 3/16-inch steel for durability and, like all other Park Tools, comes with a limited lifetime warranty.
