

THE GOODS

PERFECT VISION

Climb right up on Mrs. Claus' lap and let her know that this year you'd like your stocking stuffed with the latest Twenty20 high-res motorcycle camera. Designed in partnership with OmniVision, the Twenty20 camera features a cutting-edge CMOS (complimentary metal oxide semiconductor) image sensor that delivers a vivid and fast-paced video image that rivals CCD cameras in quality while maintaining advantages in size (3 inches x 1 inch), weight (4oz.), durability (one-year warranty) and price (\$299.99). Powered by your motorcycle battery and secured to the bike with an anti-vibration mount, the Twenty20 camera offers 480 scan lines of VGA-quality resolution and can capture footage day or night thanks to its .01 Lux minimum illumination rating.

"HAVE YOU BEEN NAUGHTY, OR NICE?"

THE THIRD DIMENSION

Make your GSX-R stand out—literally—with this new 3-D stator cover from Patrick's Performance. Made from aircraft-grade aluminum, Patrick's 3-D cover features a raised "R" insignia underlined with "GSX" lettering for an unparalleled custom look. Made to fit the '03-'06 GSX-R1000 and '04-'05 GSX-R600/750s, these covers are available in billet or chromed finishes for \$269.95 and \$299.95, respectively. Best of all, no funny glasses are required to enjoy the 3-D effect.

COOL SPOOLS

Ride Engineering is a well-known name in dirt circles, manufacturing components for championship-winning off-road riders since 2001. But dirt isn't the only deal in the Ride Engineering workshop—Ride supports street guys too and has recently expanded its line of sportbike goodies to include these new swingarm spools that are compatible with pretty much any rear work stand currently on the market. Carved from aluminum and available in red, blue or black hues to fit most popular sportbikes (6mm, 9mm or 10mm threads), these simple and sano spools will add some style to your ride for just \$29.95.
